

ContentStream

Powerful visual library - content management system that simplifies the way you store, access, and share your visual assets. It provides a centralized solution for managing all your visual content, from images to videos to graphics

Escape perpetual content chaos and never-ending treasure hunts through Shared folders or Drop-boxes. It's time to revolutionise your visual content management!

Major Features

1

Centralised Location: Centralised cloud based platform for storing, organizing, and accessing visual assets.

2

Categorise: Organize your visual assets into categories based on themes, topics, or content types.

3

Version Control: Stakeholders have access to the latest version of content, reducing the risk of outdated content being used.

4

Universal Search: Adding metadata to your visual assets such as titles, descriptions, and tags.

5

Collaboration: A centralized platform for all stakeholders to work together, track progress, and provide feedback.

6

Workflow Automation: Streamlines the content management process by automating tasks such as approvals, notifications, and publishing.

7

Analytics: Visual Library provides valuable analytics track performance, identify areas for improvement, and optimize content delivery.

8

Material Distribution Tracker: Manages the processing of content requests, logging, authorization and tracking of delivery.

Take control of all visual content and streamline workflows with
ContentStream
